

IT PARTNER Broschure

Highly Secure Collaboration in a Business Cloud Solution.

Welcome to leitzcloud!

We at leitzcloud strive to create digital technologies for companies that are as efficient and accessible as possible - intelligent collaboration in Germany. With this vision, leitzcloud by vBoxx was established - by a partnership between LEITZ and vBoxx.

leitzcloud is a highly secure business cloud solution for fast collaboration in companies. leitzcloud is certified multiple times, GDPR compliant, and immediately applicable. We support you with your daily challenges when it comes to internal and external collaboration.

Thanks to our Sync-Tool and our Apps you are mobile and secure even on the go. You also profit from an easy connection to your own server, Web-DAV, and Active Directory.

Do you want to personalise and individualise your Cloud and your E-Mails? Our Cloud offers an extensive branding package.

We are pleased to welcome you!

MORE FEATURES

Both administrators as well as users profit from our **extensive and diverse variety of cloud functions**. You can discover a wide range of adjustable features in your organisational settings. Manage your own **policies concerning users, trim settings, purge settings**, and more.

SHARE DISCLAIMER

Do you want to use a legal disclaimer to **provide additional protection** to your data? Guest users confirm your own formulated disclaimer before they can access the document you shared.

CORPORATE BRANDING

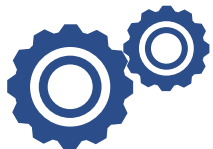

Your Corporate Branding in your Cloud - entirely according to your vision. Change the **logo, symbol, start screen and Sync-Tool branding** per organisation to guarantee perfect customer image.

OUR APPLICATIONS

leitzCloud is **multi-platform compatible** and allows you to flexibly synchronise your data locally on your computer. Are you using our SyncTool yet? Thanks to live-synchronisation, all changes are automatically saved.

With our **leitzcloud App and Scan App for Android and iOS**, you can access your data easily and comfortably **on the go**.

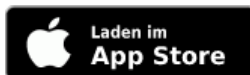

leitzcloud App and Scan-App

Our diverse Apps are compatible with Android and iOS. They offer a troublefree work environment in your office and beyond. No extra scanner necessary..

Sync-Tool

Do you want to access your data structure comfortably in your Finder or Explorer? With the Sync-Tool, you can see and work with your files locally on your desktop.

OUR DATA CENTRES

Modern Security made in Germany

MAINCUBES FRA01

All your data is securely saved in a **multiple ISO certified data centre** located in Frankfurt, which adheres to strict quality and information management rules and guidelines. Its security systems are being continuously tested to provide the best possible security.

NEW IN 2023

DATACENTER RHEIN-NECKAR II

To provide a secure geo redundancy for your data, we additionally offer the highly secure **data centre DCRN II** to save and protect your data. The data centre is located in Rheinland-Palatinate and is also **multiply TÜV certified** and holds a **ISAE 3402 SOC 1 Testat** as well.

Global Connection DE-CIX

The internet node DE-CIX in Frankfurt is considered of the best networked connections points in the world in terms of the volume of data.

IT and Physical Security

Highly secure access controls, extensive fire protection concept, video surveillance, and a 24/7 site security - we care for your individual security.

Architecture

The highly secure leitzcloud servers are being continuously monitored by our technical department.

Sustainability

Our data centres run on 100% green electricity, use solely modern cooling systems, and are highly energy efficient.

PRIVATE CLOUD OFFER

With a private cloud by means of our or your own hardware, you have the opportunity to have a private infrastructure in your desired data centre. Only you can control the server - including **offsite data protection and extensive user management**.

Do you want **Single Sign-On (SSO)** or **Custom IP accessibility options**?
No problem!
Various of integration options are possible.

Enterprise Support

We are available 24/7 verfügbar and are pleased to help and support you. We monitor your IT-Hardware with you.

Whitelabel Functionality

With a private cloud, you profit from complete White Labeling possibility: Set up your cloud according to your needs.
